

In a letter we received from General Directorate of Customs, it is stated that, relying on the MoU among our Union, Ministry of Customs and Trade and IRU signed on 05/06/2012 about the IRU TIR EPD application, TIR EPD Green Lane has been functioning in Kapikule Customs Administration since 01/11/2012. Following this, Dilucu Customs Administration, which its modernisation was conducted by our Union's affiliate company GTI A.S. and started its operation on 19/10/2015, now has been featured with TIR EPD Green Lane starting from 15/02/2016.

Please note that, TIR EPD Green Lane in Dilucu Customs Border Gate is available in one entry direction and one exit direction platforms. These platforms are directed by signs and signboards stated as "TIR EPD Hizli Gecis Hatti / TIR EPD Green Lane / Fast Track Lane" in the customs area.

We have informed Turkish TIR Holders about this new TIR EPD Green Lane in order to facilitate incoming, outgoing and transit transport operations which are carried out through Dilucu Customs Border Gate to / from Republic of Azerbaijan Nakhchivan Autonomous Republic.

We kindly request you to disseminate this information to IRU Member Associations in order to facilitate the transports through Dilucu Customs Border Gate and maximize the benefit of TIR EPD Green Lane for the hauliers.
