

Transit Tyrol – Blockabfertigungen first half of 2020

Austria

The attached “Dosierkalender” gives an outline of dates of the “Blockabfertigungen” during the first half of 2020 that the government of Tyrol will be implementing.

As usual, authorities will filter HGV transit on the A 12 – “Inntalautobahn” – at the border crossing Kufstein/Kiefersfelden, direction South, as of 05.00 am in the morning. Note that starting next year, an automatic dosage system will be used to regulate the transit of heavy goods vehicles at border.
