

Bad weather conditions in Spain and France: road closures

Spain - France

Due to bad weather conditions (high winds, heavy rain and snow) in Spain and South of France, road closures may be expected on both sides of the border.

In Spain, the General Road Traffic Directorate (DGT) has announced road closures for trucks in the eastern part of the country (provinces of Alicante, Valencia and Murcia). Updated information can be found [here](#).

French authorities have also restricted roads closures, as on the RN116 between PR 98+500 (commune de Bourg Madame) and PR 43 (commune de Prades) for goods vehicles of over 19t total laden weight. Updated information can also be found [here](#).
