

Friday - 21.02.2020

09:15 - 10:00

Registration open and welcome coffee

10:00 - 10:10

Welcome to the IRU Logistics and Innovation Forum

IRU will welcome participants and introduce the key themes and partners for the 2020 Forum.

10:10 - 10:20

Can new technology deliver safer and more profitable logistics? Views from a global transport operator

Over the past few years, new digital solutions have emerged broadening transport operators' horizons.

10:20 - 10:30

Can new technology deliver safer and more profitable logistics? Views from a global logistics player

Safety standards are an integral part of our workplace culture and road safety is at the heart of our transport and logistics operations.

10:30 - 10:40

Can new technology deliver safer and more profitable logistics? Views from a multinational pharmaceutical company

10:40 - 11:00

Q & A

Girteka, Amazon, and GSK.

11:00 - 11:20

Networking and coffee break

11:20 - 11:35

What to expect from intelligent trucks

The transportation industry is undergoing a revolution which will dramatically shift the design of future commercial vehicles.

11:35 - 11:50

Will truck platooning change the game?

The transportation industry has great expectations vis a vis automated trucks. However, the introduction of the first generation vehicles is still a long way ahead and the large-scale deployment even further away.

11:50 - 12:10

Q & A

Volvo & DAF

12:10 - 12:25

UK perspectives on safety and innovation

For decades, innovation and technology have led to better safety in the UK logistics sector, one of the most competitive in the world. What does the future hold for UK operators?

12:25 - 13:15

Networking lunch break

13:15 - 13:30

How can digital platforms safely facilitate data sharing and data monetization?

Digital platforms play a key role in facilitating data sharing and data monetization through marketplaces.

13:30 - 13:45

Disruption and safety: Lessons learned from Uberfreight

13:45 - 14:00

Averting accidents through better fleet management

Avoiding accidents has always been a challenge due to their spontaneous nature.

14:00 - 14:15

Digitalisation of transport for improved road safety

In a highly digitalised world, data and information are finding valuable new uses to boost safety and find new business opportunities.

14:15 - 14:30

Digitalisation as accelerator for safety and security in road transportation

14:30 - 14:50

Q & A

HERE Technologies, Uber Freight, SmartCargo, Bunasta, TransFollow

14:50 - 15:10

Networking coffee break

15:10 - 15:25

Watching out for safety: Smart cameras

The multiplication of security cameras across Europe has gathered media attention over the impact of massive surveillance on privacy.

15:25 - 15:40

How are psychometric tests upgrading drivers' recruitments?

For decades, the industry and regulators have rightly placed faith in technology to address safety concerns.

15:40 - 16:00

Q & A

Lytx, Aptidrive

16:00 - 16:30

Wrap-up, awards and conclusion

So is investing in safety really a business opportunity?

16:30 - 19:00

Networking cocktail

Key

- Sessions and Panels
- Business talks 1: Focus on vehicles
- Business talks 2: Focus on operations
- Business talks 3: Focus on drivers
