

## **Posting in the Netherlands: introduction notification rules – clarification for passenger transport**

*Netherlands (the)*

As from 1 March 2020, the Netherlands introduces an electronic notification system for employers whose drivers are temporarily posted in the Netherlands. **Note that passenger transport by road is exempted from these rules.**

There is therefore no obligation for passenger transport companies to report their drivers. The requirement to report posted workers don't apply to an eventual guide on the bus either, if there is a close connection between the guide and the transport service.

(More details on the new regulation for goods transport is available on a previously published Flash Info or on IRU Information Centre – Authorizations, Goods Transport.)
